CITY-WIDE AVERAGE

Average mosquitoes per trap. The City considers nuisance fogging when counts climb to about 100 per trap.

Residents can register a fogging buffer zone around their home through the City's Insect Control branch.

Radon potential

MANITOBA – SOUTHERN REGIONAL REFERENCE

7% of tested homes were at or above Health Canada's 200 Bq/m³ guideline.

This is a regional figure, not a reading for this address — radon varies house to house. The only way to know is a long-term test.
